Volume 16, 1974

*published monthly by the*  
AMERICAN GEOLOGICAL INSTITUTE

5205 Leesburg Pike  
Falls Church, Va. 22041

INTERNATIONAL GEOLOGY REVIEW is published monthly with a supporting grant from the National Science Foundation. Papers are selected for translation from a large number of Russian geological journals in all disciplines. Nonserial works are reviewed and on occasion significant portions translated and published in IGR. Prepublication announcement of geologically important Soviet literature is a regular feature. IGR has an annual subject and author index. Copyright © 1974 American Geological Institute. Printed in the United States of America. All rights reserved. This book, or parts thereof, may not be reproduced in any form without permission of the publisher.

Selection of papers for translation and publication is made on the advice of the AGI Translations Committee and the liaison representatives of AGI member societies. However, readers are encouraged to suggest significant papers from the foreign literature for consideration. Comments and discussions of papers published in IGR are invited.
